landscape design ltd

## practice background

Bea Landscape Design Limited is an established Landscape Architect and Urban Design practice with over 20 years experience. Based in Wolverhampton, West Midlands we are currently involved in an extensive portfolio of projects throughout the United Kingdom.

Each project is approached on the basis of providing the Client with a professional service founded on technical soundness and appropriate innovation to achieve a successful project, completed within budget and to programme.

The majority of projects carried out by Bea Landscape Design are of a multi-disciplinary nature working closely with Architects, Engineers and Planners in the private sector, Central and Local Government both as part of the design team and design team leaders.

In order to provide a comprehensive service to clients Bea Landscape Design has developed a design staff with expertise in landscape architecture, urban design, environmental assessment, landscape management and arboriculture. The practice has associated consultants with specialists in Ecology and Hydrology.

Project: HQ Building, Coleshill Manor

Client: I M Properties Ltd

## landscape design

“Landscape Architects identify and solve problems using design techniques based on an understanding of the external environment, knowledge of the functional and aesthetic characteristics of landscape materials, and of organisation of landscape elements, external spaces and activities.”

[Landscape Institute](#)

As a registered practice with the Landscape Institute, Bea Landscape Design provides the full range of services listed with the 'Landscape Consultants Appointment' as published by the Landscape Institute, Appendix 1 'Landscape Consultant's Services' from inception (Workstages A) through to completion (Workstage L).

Project: Doncaster Community Stadium, Doncaster

Client: Doncaster City Council

Project: Riverside and Canal Basin Redevelopment, Stourport

Client: British Waterways

# land management

Bea Landscape Design offers a full range of Landscape Management services complimenting the design and implementation standard works stages.

Services range from Tree Surveys in accordance with BS5837: 2005, to Arboricultural Implication Assessments, Arboricultural Method Statements & Schedules of Works required to facilitate a proposed development from its inception.

The practice is also frequently involved in the preparation of Landscape Management plans which are carried out in-conjunction with development proposals outlining aims, objectives and management schedules & proposed operations with set timescales.

Landscape Maintenance Audits include inspections of completed landscape schemes to ensure they are in accordance with the approved layouts and/or specifications.

Project: Veteran Tree Translocation, Newton Aycliffe

Client: Easter Group

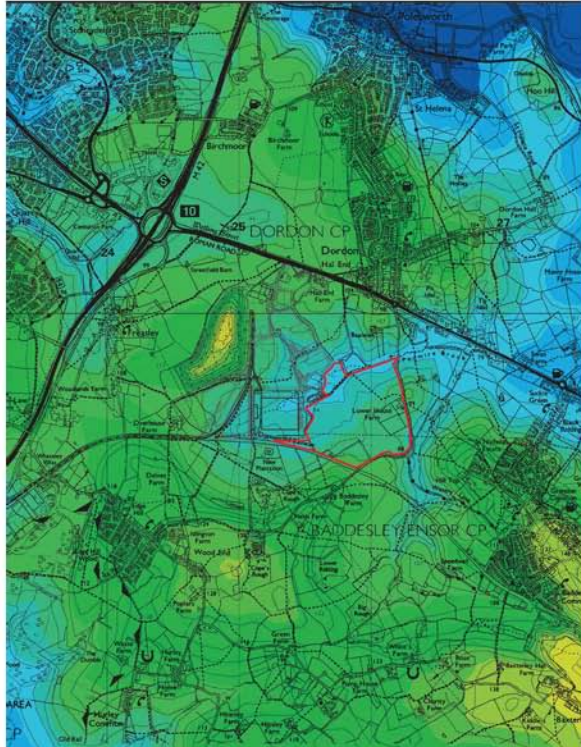

Project: Lidkmoor Coppice, Croome Landscape Park

Client: National Trust

Project: Tree Survey, Northfield

Client: Bournville College

Project: Birch Coppice, Dordon

Client: I M Properties Limited

## e.i.a

“ Environmental assessment seeks to ensure that significant environmental effects are fully taken into account in development decisions; establishing, presenting and considering environmental information in a systematic way. ”

Department of the Environment

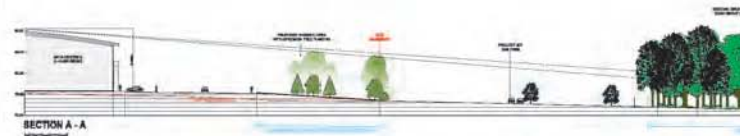

For both large and small scale Developments Bea Landscape Design regularly prepares Landscape and Visual Impact Assessments in accordance with the Institute of Environmental Management and Assessment Guidelines; including the identification of the Zone of Visual Influence (ZVI), through the use of terrain modelling software.

Project: Ively Road, Farnborough

Client: Kenmore Properties Limited

Project: Ively Road, Farnborough

Client: Kenmore Properties Limited

## 3D visualisation

Bea Landscape Design utilises a range of software to accurately generate illustrations and animations of proposed schemes. Software includes AutoCAD, Key 3D, 3D Studio Max and SketchUp supported by graphics packages such as Photoshop and CorelDRAW.

The Practice also operates AutoCad Map and Key-Terra-Firma in support of GIS based assessments and 3D ground modelling to identify Zones of Visual Influence as part of Environmental Impact Assessments. This software also provides the ability to calculate volumes for use in cut and fill exercises.

Bea Landscape Design primarily uses 3D computer software to generate landscape visualisations of schemes. Photorealistic illustrations can also be created known as photomontages which give the client a true representation of a proposed scheme.

Project: Llwyn Hudol Plas

Client: North Wales Equestrian Centre

Project: A446 Traffic Island, Colehill

Client: I M Properties Limited

Project: Communal Garden, World Prayer Centre

Client: World Prayer Centre

Project: Lord Street, Walsall

Client: Walton Homes

## urban design

The art of making places involves the design of groups of buildings, spaces and landscapes in villages, towns and cities to create inclusive and environmentally sensitive developments.

Bea Landscape Design offers a number services in the urban environment from initial conceptual master planning proposals for new developments to subtle environmental enhancements to design out crime or just improve the look of an untidy street scene.

The practice has also been involved in the creation of 'Home-Zone' and pedestrianisation schemes, in which the principle is to remove the dominance of vehicles and to give the street back to the residents, allowing for greater community ownership and involvement.

Bea Landscape Design is regularly involved in larger urban regeneration projects working as part of multidisciplinary teams revitalising old derelict urban areas through modern detailed design processes.

Project: Rowley Learning Campus, Sandwell BSF

Client: Balfour Beatty "Transform"

Project: The Waterfront, Brierley Hill

Client: Richardson Developments

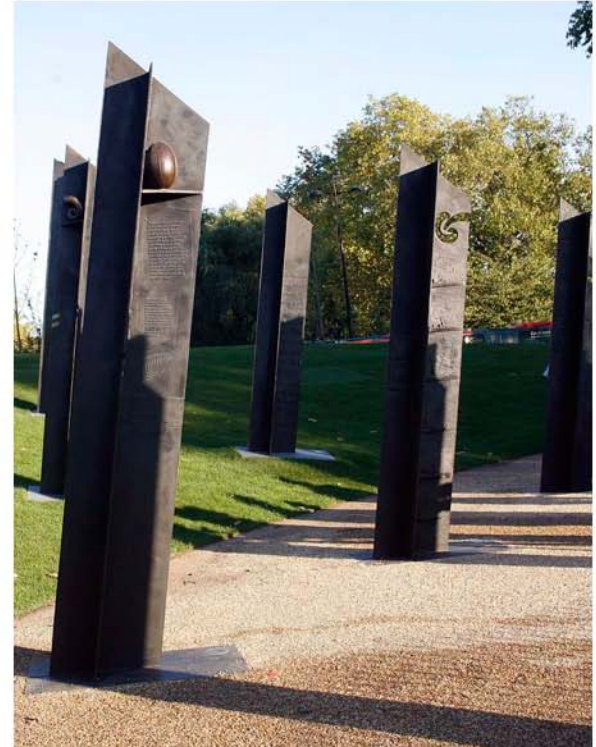

## other services

Bea Landscape Design offers a wide range of other services associated with numerous aspects of environmental design and are trained to co-ordinate the complexities involved in a wide range of specific schemes. Some of these additional services include Expert Witness, Project Management, Hydrology, Ecology, Art in the Landscape and Garden Design.
